SUMMARY

I build and deploy scalable, cloud-native applications using Angular, Django, Docker, Kubernetes, AWS, and CI/CD pipelines.

SKILLS

- HTML5, CSS3, JavaScript, Typescript, Angular
- Python, Django, Djangorestframework

Linux, CI/CD, Docker, K8s, Ansible, Terraform, AWS

Nginx

PROJECTS ErrandHub:

An Errand Service Platform that connects people with reliable service providers, enabling users to hire professionals for errands seamlessly.

The platform offers user authentication, profile management, advanced search and filtering to hire service providers, real-time chat for negotiations, contract creation with milestone-based payments, and secure payment integration with automated release upon contract completion.
